| Course No. | Course Name | L-T-P-Credits | Year of Introduction |
| :---: | :---: | :---: | :---: |
| ME100 | BASICS OF MECHANICAL <br> ENGINEERING | $2-1-0-3$ | 2016 |

## Course Objectives

To expose the students to the thrust areas in Mechanical Engineering and their relevance by covering the fundamental concepts.

## Syllabus

Thermodynamics, laws of thermodynamics, implications, cycles, energy conversion devices, steam and water machines, engines, turbo machines, refrigeration and air conditioning, power transmission devices in automobiles, latest trends, engineering materials and manufacturing processes, types of materials, alloys, shape forming methods, machine tools.

## Expected outcome

The student will be able to understand the inter dependence of the thrust areas in Mechanical Engineering and their significance leading to the development of products, processes and systems.

| Course Plan | Hours | Sem. <br> Exam <br> Marks |  |
| :---: | :--- | :---: | :---: |
| I | Contents | 7 | $15 \%$ |
|  | Thermodynamics: Laws of Thermodynamics, significance and <br> Applications of thermodynamics, entropy, Ideal and real gas <br> equations; Analysis of Carnot cycle, Otto cycle, Diesel cycle; <br> Efficiency of these cycles. | 7 | $15 \%$ |

|  | Engines (SI and CI), Fuels, CRDI,MPFI,Hybrid Engines, Reciprocating <br> pumps, centrifugal pumps and hydraulic turbines.(Elementary ideas only) |  |  |
| :---: | :--- | :---: | :---: |
| FIRST INTERNAL EXAM |  |  |  |
| III | Refrigeration and Air Conditioning: Vapour compression refrigeration <br> systems, Heat Pump, COP, Study of household refrigerator, Energy <br> Efficiency Rating, Psychrometry, Psychrometric processes, window air <br> conditioner, split air conditioner. <br> Refrigerants and their impact on environment. | 7 | $15 \%$ |
| IV | Automobiles and Power Transmission Devices, Different types <br> of automobiles, types of power units in automobiles; major components <br> and their functions ( brief description only); <br> Belts and belt drives; Chain drive; Rope drive; Gears and gear trains; <br> friction clutch (cone and single plate), brakes <br> (types and applications only). | 7 | $15 \%$ |
| SECOND INTERNAL EXAM |  |  |  |
| V | Materials and manufacturing processes: Engineering materials, <br> Classification, properties, Alloys and their Applications; Casting, Sheet <br> metal forming, Sheet metal cutting, Forging, Rolling, Extrusion; Metal <br> joining processes - soldering, brazing and welding; Powder <br> metallurgy.(Elementary ideas only). | 7 | $20 \%$ |
| VI | Machine Tools (Basic elements, Working principle and types of <br> operations), Lathe, Drilling Machine, <br> Shaper, planer, slotter, Milling Machine, Grinding <br> machine; Introduction to CNC machines. | 7 | $20 \%$ |

## Question Paper Pattern:

Part A: Modules I and II - three questions of 15 marks each - out of which two questions are to be answered.

Part B: Modules III and IV - three questions of 15 marks each - out of which two questions are to be answered.

Part C: Modules V and VI - three questions of 20 marks each - out of which two questions are to be answered.

Each question can have maximum of four subdivisions (a,b,c,d).
