GEN 201

"CREATING THE NEXT GENERATION"

ABOUT DEPARTMENT

The Department of Artificial Intelligence, established in 2023, is dedicated to fostering innovation and excellence in technology. To inspire young minds and spark creativity at an early stage, the department is organizing a State-Level Hackathon for School Students "GEN 201".

This event provides a dynamic platform for students to showcase their ideas, collaborate on real-world problems, and develop solutions using the power of technology and innovation. By bringing together bright school talents from across the state, the hackathon aims to encourage problem-solving, teamwork, and future-ready skills, while nurturing the next generation of innovators.
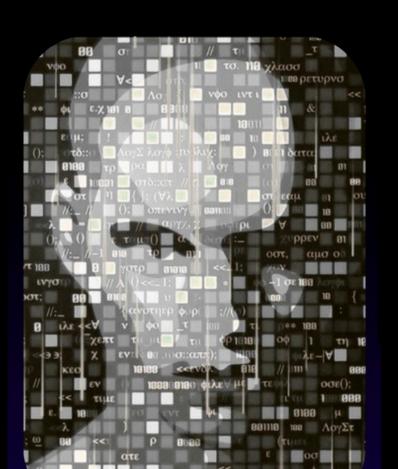

ROCKING GUEST

Raul John Aju - 16 years old. from Kochi, India. Started with robots when he was 10. Now he build AI tools that actually help people and businesses.

Right now. He was the Founder of AI Realm Technologies, where they create legal bots, automation tools, and even humanoid robots like Mebot. His AI-powered clone.
