## **Report**

“Expect change. Analyze the landscape. Take the opportunities. Stop being the chess piece; become the player. It’s your move.”

--Tony Robbins

The IEEE Computational Intelligence Society and Computer Society SBC of MBCCET collaborated to initiate an insight to discover a level deep on Data Science in practice. A live webinar session was handled by Mr. Abhijith Asok, Data Scientist, Microsoft, on the topic "Data Science in practice: One layer deeper".

This event was virtually conducted through the Zoom platform, on **27** of August 2021. This live session spanned from 9-11 pm. The session concluded with an interactive Q&A. Recordings of the sessions were also provided.

It was beneficial as well as inspiring to all the participants. An introduction to the reality behind the data science in practice was illustrated to the audience by referring to his professional experiences. The event was successful with the active participation of the delegates from various IEEE student branches. By the end, a certificate of participation was distributed to all the participants.
