The exhibition covered several topics related to innovate with nature and to give knowledge to the people regarding pollution so that a better or clean environment can be formed.

The main objective is to make people aware, and spread awareness in the industries that cause various pollution like water, air, soil, and noise and affect the environment and obviously health.

The participants were discussed how to control the Industrial disaster and to reduce the level of pollution.

Various ways to reduce Pollution

- Pollution can be reduced by treating and managing solid waste.
- By the facility of Biochemical waste, the reuse of waste pollution can be reduced.
- By the treatment of Electronic waste, pollution can be reduced.
- Pollution in Urban areas can be reduced by the Clean Development Mechanism Project.

Therefore, it is necessary to control pollution and it is not the Government's duty we should also participate and make the environment clean and live disease-free. A clean environment helps people to do their tasks in a better way and live life happily.
